Contents for Volume 164

Number 1, 7 *September* 1993

VARMUZA, S., Gametic Imprinting as a Speciation Mechanism in Mammals . 1

TYSON, R., WELCH, W. T., BERREEN, J., WELLS, C. and PEARSON, C. E., Pressure Changes in the Eye Due to an Injection of Inert Gases: A Theoretical Model 15

KEPLER, T. B. and PERELSON, A. S., Somatic Hypermutation in B Cells: An Optimal Control Treatment 37

TAYLOR, W. R. and JONES, D. T., Deriving an Amino Acid Distance Matrix 65

HÖFER, T. and HEINRICH, R., A Second-order Approach to Metabolic Control Analysis 85

SLOMINSKI, A., PAUS, R. and SCHADENDORF, D., Melanocytes as "Sensory" and Regulatory Cells in the Epidermis 103

FERNÁNDEZ, A., LEWIN, A. S. and RABITZ, H., Structure-induced Strain Determining the Internal Cyclization Site in the Yeast cobI5 Autocatalytic Intron: Theory and Experimental Tests 121

Number 2, 21 *September* 1993

LUNDSTRÖM, K. I., KARLSSON, J. O. G., SVENSSON, S. P. S., MÅRTENSSON, L. G. E., ELWING, H., ÖDMAN, S. and ANDERSSON, R. G. G., Local and Non-local Receptor Signalling 135

BACONNIER, P. F., BENCHETRIT, G., PACHOT, P. and DEMONGEOT, J., Entrainment of the Respiratory Rhythm: A New Approach . . . 149

LUNDBERG, S. and PERSSON, L., Optimal Body Size and Resource Density . 163

BRITT, B. M., A Shifting Specificity Model for Enzyme Catalysis . . . 181

PAGEL, M., Seeking the Evolutionary Regression Coefficient: An Analysis of What Comparative Methods Measure 191

FRANCE, J., BEEVER, D. E. and SIDDONS, R. C., Compartmental Schemes for Estimating Methanogenesis in Ruminants from Isotope Dilution Data . 207

McNamara, J. M., Houston, A. I. and Weisser, W. W., Combining Prey Choice and Patch Use—What Does Rate-maximizing Predict? . . 219

Norris, V., Sequestration of Origins of Chromosome Replication in *Escherichia coli* by Lipid Compartments: The Pocket Hypothesis . . 239

Regen, D. M., Characterization of Myocardial Stress–Length Relations . 245

Allison, L., A Fast Algorithm for the Optimal Alignment of Three Strings . 261

Number 3, 7 *October* 1993

Faro, J. and Velasco, S., Studies on a Recent Class of Network Models of the Immune System 271

Ferreira, R. and Coutinho, K. R., Simulation Studies of Self-replicating Oligoribotides, with a Proposal for the Transition to a Peptide-assisted Stage 291

Matsumoto, J., Speculations on the Roles of ADP-ribosyl Transferase Based on Analogies Between RecA and Poly(ADP-ribose) Polymerase . . 307

Melton, R. H., Body Size Evolution and the Concept of Alloenergetic Change 321

Gerard, J.-F., Vancassel, M. and Laffort, B., Spread of Phenotypic Plasticity or Genetic Assimilation: The Possible Role of Genetic Constraints 341

Szathmáry, E., A Note on the Reduction of the Dynamics of Multilocus Diploid Genetic Systems with Multiplicative Fitness 351

Bonhoeffer, S. and Stadler, P. F., Error Thresholds on Correlated Fitness Landscapes 359

Iwasa, Y., Overdispersed Molecular Evolution in Constant Environments . 373

Ogurtsov, A. Y., Elkin, Y. E. and Shabalina, S. A., Calculation of Contributions of Individual Monomeric Units to Biopolymer Function . 395

Letter to the Editor

Margineanu, D.-G., Dimensionality, Time Scales and Membrane Thermodynamics 403

Number 4, 21 *October* 1993

Kornet, D. J., Permanent Splits as Speciation Events: A Formal Reconstruction of the Internodal Species Concept 407

MAYNARD SMITH, J. and SZATHMÁRY, E., The Origin of Chromosomes I. Selection for Linkage 437

SZATHMÁRY, E. and MAYNARD SMITH, J., The Evolution of Chromosomes II. Molecular Mechanisms 447

GRANER, F., Can Surface Adhesion Drive Cell-rearrangement? Part I: Biological Cell-sorting 455

GRANER, F. and SAWADA, Y., Can Surface Adhesion Drive Cell Rearrangement? Part II: A Geometrical Model 477

FLETCHER, H. L. and RAFFERTY, J. A., The Effects of Unequal Sister Chromatid Exchange on Length of Arrays of Repeated Sequences . 507

JOHANSSON, S., Switch-like Membrane Properties Computed from Classical-type Na^+ and K^+ Currents: A Neuronal Memory Device 515

WHITAKER, L. and RENTON, A. M., On the Plausibility of the Clonal Expansion Theory of the Immune System in Terms of the Combinatorial Possibilities of Amino-acids in Antigen and Self-tolerance 531

LETTER TO THE EDITOR

HOLGATE, P., Families of Multivalent Kinship Relations 537

Index to Volume 164

Adhesion, surface, can it drive cell rearrangement?; biological cell-sorting, 455
Adhesion, surface, can it drive cell rearrangement?; a geometric model, 477
ADP-ribosyl transferase, speculations on role of, 307
Algorithm for the optimal alignment of three strings, 261
Alignment, optimal, of three strings, a fast algorithm for, 261
ALLISON, L., A fast algorithm for the optimal alignment of three strings, 261
Alloenergetic change and body size evolution, 321
Amino-acids, combinatorial possibilities of; clonal expansion theory of the immune system, 531
Amino acid distance matrix derivation, 65
ANDERSSON, R. G. (see LUNDSTRÖM, K. I.), 135

B cells, somatic hypermutation in; optimal control treatment, 37
BACONNIER, P. F., BENCHETRIT, G., PACHOT, P. and DEMONGEOT, J., Entrainment of the respiratory rhythm: a new approach, 149
BEEVER, D. E. (see FRANCE, J.), 207
BENCHETRIT, G. (see BACONNIER, P. F.), 149
BERREEN, J. (see TYSON, R.), 15
Biopolymer function, calculation of contributions of individual monomeric units to, 395
Body size evolution and the concept of alloenergetic change, 321
Body size, optimal, and resource density, 163
BONHOEFFER, S. and STADLER, P. F., Error thresholds on correlated fitness landscapes, 359
BRITT, B. M., A shifting specificity model for enzyme catalysis, 181

Catalysis, enzyme; a shifting specificity model, 181
Cells, B, somatic hypermutation in, 37
Cell rearrangement, can it be driven by surface adhesion?; biological cell-sorting, 455
Cell rearrangement, can it be driven by surface adhesion?; a geometrical model, 477
Cells, "sensory" and regulatory, in the epidermis, melanocytes as, 103
Cell-sorting, biological, and surface adhesion, 455
Chromatid exchange, sister, unequal; effects on length of arrays of repeated sequences, 507
Chromosomes, evolution of; molecular mechanisms, 447
Chromosomes, origin of; selection for linkage, 437
Chromosome replication in *Escherichia coli*, sequestration of origins by lipid compartments; the pocket hypothesis, 239
Clonal expansion theory of the immune system, 531
COUTINHO, K. R. (see FERREIRA, R.), 291
Cyclization site in the yeast cob15 autocatalytic intron determined by structure-induced strain; theory and experiment, 121

DEMONGEOT, J. (see BACONNIER, P. F.), 149
Dimensionality, time scales aand membrane thermodynamics (letter), 403
Diploid multilocus genetic systems, reduction of dynamics of, 351
Distance matrix, amino acid; derivation, 65
Dynamics of multilocus diploid genetic systems, reduction of, 351

ELKIN, Y. E. (see OGURTSOV, A. Y.), 395
ELWING, H. (see LUNDSTRÖM, K. I.), 135

Entrainment of the respiratory rhythm: a new approach, 149
Enzyme catalysis; a shifting specificity model, 181
Epidermis, melanocytes as "sensory" and regulatory cells in, 103
Error thresholds on correlated fitness landscapes, 359
Escherichia coli, sequestration of origins of chromosome replication in, by lipid compartments; the pocket hypothesis, 239
Evolution, body size, and the concept of alloenergetic change, 321
Evolution of chromosomes; molecular mechanisms, 447
Evolution, molecular, overdispersed, in constant environments, 373
Evolutionary regression coefficient; analysis of what comparative methods measure, 191
Eye, pressure changes in, due to an injection of inert gases; theoretical model, 15

Families of multivalent kinship relations (letter), 537
FARO, J and VELASCO, S., Studies on a recent class of network models of the immune system, 271
FERNÁNDEZ, A., LEWIN, A. S. and RABITZ, H., Structure-induced strain determining the internal cyclization site in the east cob15 autocatalytic intron: theory and experimental tests, 121
FERREIRA, R. and COUTINHO, K. R., Simulation studies of self-replicating oligoribotides, with a proposal for the transition to a peptide-assisted stage, 291
Fitness landscapes, correlated, error thresholds on, 359
Fitness, multiplicative, the reduction of dynamics of multilocus diploid genetic systems with, 351
FLETCHER, H. L. and RAFFERTY, J. A., The effects of unequal sister chromatid exchange on lengths of arrays of repeated sequences, 507
FRANCE, J., BEEVER, D. E. and SIDDONS, R. C., Compartmental schemes for estimating methanogenesis in ruminants for isotope dilution data, 207

Gametic imprinting as a specification mechanism in mammals, 1
Gases, inert, theoretical model of pressure changes in the eye due to injection of, 15
Genetic assimilation; role of genetic constraints, 341
Genetic systems, diploid, multilocus, reduction of the dynamics of, 351
GERARD, J.-F., VANCASSEL, M. and LAFFORT, B., Spread of phenotypic plasticity or genetic assimilation: the possible role of genetic constraints, 341
GRANER, F., Can surface adhesion drive cell re-arrangement? Part I: Biological cell-sorting, 455
GRANER, F. and SAWADA, Y., Can surface adhesion drive cell rearrangement? Part II: A geometrical model, 477

HEINRICH, R. (see HÖFER T.), 85
HÖFER, T. and HEINRICH, R., A second-order approach to metabolic control analysis, 85
HOLGATE, P., Families of multivalent kinship relations (letter), 537
HOUSTON, A. I. (see MCNAMARA, J. M.), 219
Hypermutation, somatic, in B cells; optimal control, treatment, 37

Immune system, clonal, expansion theory of, 531
Immune system, studies on a recent class of network models, 271
Imprinting, gametic, as a speciation mechanism in mammals, 1
Isotope dilution data, compartmental schemes for estimating methanogenesis in ruminants from, 207
IWASA, Y., Overdispersed molecular evolution in constant environments, 373

JOHANSSON, S., Switch-like membrane properties computed from classical-type Na^+ and K^+ currents: a neuronal memory device, 515

Jones, D. T. (see Taylor, W. R.), 65

Karlsson, J. O. G. (see Lundström, K. I.), 135
Kepler, T. B. and Perelson, A. S., Somatic hypermutation in B cells: a optimal control treatment, 37
Kinship relations, multivalent, families of (letter), 537
Kornet, D. J., Permanent splits as speciation events: a formal reconstruction of the internodal species concept, 407

Laffort, B. (see Gerard, J.-F.), 341
Lewin, A. S. (see Fernández, A.), 121
Lipid compartments, sequestration of origins of chromosome replication in *Escherichia coli* by; the pocket hypothesis, 239
Lundberg, S. and Persson, L., Optimal body size and resource density, 163
Lundström, K. I., Karlsson, J. O. G., Svensson, S. P. S., Mårtensson, L. G. E., Elwing, H., Ödman, S. and Andersson, R. G. G., Local and non-local receptor signalling, 135

McNamara, J. M., Houston, A. I. and Weisser, W. W., Combining prey choice and patch use—what does rate-maximizing predict?, 219
Mammals, gametic imprinting as a speciation mechanism in, 1
Margineanu, D.-G., Dimensionality, time scales and membrane thermodynamics (letter), 403
Mårtensson, L. G. E. (see Lundström, K. I.), 135
Matsumoto, J., Speculations on the roles of ADP-ribosyl transferase based on analogies between recA and poly(ADP-ribose) polymerase, 307
Maynard Smith, J. and Szathmáry, E., The origin of chromosomes. I. Selection for linkage, 437
Maynard Smith, J. (see Szathmáry, E.), 447
Melanocytes as "sensory" and regulatory cells in the epidermis, 103
Melton, R. H., Body size evolution and the concept of alloenergetic change, 321
Membrane properties, switch-like, computed from classical-type Na^+ and K^+ currents: a neuronal memory device, 515
Membrane thermodynamics, dimensionality and time scales (letter), 403
Memory device, neuronal, 515
Metabolic control analysis, a second-order approach, 85
Methanogenesis estimation in ruminants from isotope dilution data, compartmental schemes for, 207
Molecular evolution, overdispersed, in constant environments, 373
Molecular mechanisms: the evolution of chromosomes, 447
Monomeric units, individual; contributions to biopolymer function, 395
Multiplicative fitness, reduction of the dynamics of multilocus diploid genetic systems with, 351
Myocardial stress—length relations, 245

Network models of the immune system, 271
Neuronal memory device, 515
Norris, V., Sequestration of origins of chromosome replication in *Escherichia coli* by lipid compartments: the pocket hypothesis, 239

Ödman, S. (see Lundström, K. I.), 135
Ogurtsov, A. Y., Elkin, Y. E. and Shabalina, S.A., Calculation of contributions of individual monomeric units to biopolymer function, 395
Oligoribotides, self-replicating, simulation studies; transition to a peptide-assisted stage, 291

PACHOT, P. (see BACONNIER, P. F.), 149
PAGEL, M., Seeking the evolutionary regression coefficient: an analysis of what comparative methods measure, 191
Patch use and prey choice combined; what does rate-maximizing predict?, 219
PAUS, R. (see SLOMINSKI, A.), 103
PEARSON, C. E. (see TYSON, R.), 15
PERELSON, A. S. (see KEPLER, T. B.), 37
PERSSON, L. (see LUNDBERG, S.), 163
Phenotypic plasticity, spread of; role of genetic constraints, 341
Plasticity, phenotypic, spread of; role of genetic constraints, 341
Poly(ADP-ribose) polymerase and the roles of ADP-ribosyl transferase, 307
K^+ and Na^+ currents, switch-like membrane properties computed from; a neuronal memory device, 515
Pressure changes in the eye due to an injection of inert gases; theoretical model, 15
Prey choice and patch use combined; what does rate-maximizing predict?, 219

RABITZ, H. (see FERNÁNDEZ, A.), 121
RAFFERTY, J. A. (see FLETCHER, H. L.), 507
RecA and poly(ADP-ribose) polymerase, analogies between; roles of ADP-ribosyl transferase, 307
Receptor signalling, local and non-local, 135
REGEN, D. M., Characterization of myocardial stress—length relations, 245
Regulatory cells in the epidermis, melanocytes as, 103
RENTON, A. M. (see WHITAKER, L.), 531
Replication, chromosome, in *Escherichia coli*, sequestration of origins by lipid compartments; the pocket hypothesis, 239
Resource density and optimal body size, 163
Respiratory rhythm entrainment; a new approach, 149
Rhythm, respiratory, entrainment of; a new approach, 149
Ruminants: compartmental schemes for estimating methanogenesis from isotope dilution data, 207

SAWADA, Y. (see GRANER, F.), 477
SCHADENORF, D. (see SLOMINISKI, A.), 103
Selection for linkage; the origins of chromosomes, 437
Self-replicating oligoribotides, simulation studies; transition to a peptide-assisted stage, 291
"Sensory" and regulatory cells in the epidermis, melanocytes as, 103
Sequences, repeated, length of arrays of; effects of unequal sister chromatid exchange, 507
SHABALINA, S. A. (see OGURTSOV, A. Y.), 395
Shifting specificity model for enzyme catalysis, 181
SIDDONS, R. C. (see FRANCE, J.), 207
Signalling, local and non-local receptor, 135
Size, body, evolution, and the concept of alloenergetic change, 321
Size, body, optimal, and resource density, 163
SLOMINSKI, A., PAUS, R. and SCHADENDORF, D., Melanocytes as "sensory" and regulatory cells in the epidermis, 103
Na^+ and K^+ currents, switch-like membrane properties computed from; a neuronal memory device, 515
Somatic hypermutation in B cells; optimal control treatment, 37
Speciation events, permanent splits as; the internodal species concept, 407
Speciation mechanism, gametic imprinting as, in mammals, 1
Splits, permanent, as speciation events: a formal reconstruction of the internodal species concept, 407

Stadler, P. F. (see Bonhoeffer, S.), 359
Strings, three, a fast algorithm for the optimal alignment of, 261
Structure-induced strain determining the internal cyclization site in the yeast cob15 autocatalytic intron; theory and experiment, 121
Surface adhesion, can it drive cell-rearrangement?; biological cell-sorting, 455
Surface adhesion, can it drive cell-rearrangement?; a geometric model, 477
Svensson, S. P. S. (see Lundström, K. I.), 135
Switch-like membrane properties computed from classical-type Na^+ and K^+ currents: a neuronal memory device, 515
